

## Moly Tac II ® Grease

### Description:

Northland Moly Tac II is an extreme-duty, multipurpose grease, developed for the most demanding on and off highway construction, fleet, mining, heavy duty automotive, and industrial applications. Moly Tac II is a lithium complex grease offering extremely high load carrying capability. This high viscosity base oil grease provides exceptional oxidative stability, excellent water washout resistance, and superior grease stability for extended or severe-duty. A delicate balance of molybdenum disulfide (3%), special polymers, and proven extreme pressure additives assure outstanding performance and state of the art protection under the most extreme operating conditions.

### Typical Properties- Northland Moly Tac II:

NLGI Grade		2
Appearance		Dark Moly-Purple cast
Soap type		Lithium complex
Texture		Short fiber, very tacky
Penetration, Worked 60X	ASTM D217	280
Dropping Point °F, Min.	ASTM D2265	500°+
Timken, OK Load	ASTM D2509	60 lb. Min.
Base oil viscosity		2500 SSU @ 100°F
Moly, %		3
